

Customer Journey Map

Strategic Product Placement Analysis

Project Overview

Website: Tableau Public Dashboard

Project Description:

This project analyzes retail sales data using Tableau to understand how product placement, pricing, promotions, customer demographics, seasonal factors, and competitor pricing influence sales performance. Interactive dashboards and stories help retailers identify sales trends, optimize product placement, and make data-driven business decisions.

Customer Persona

Primary User: Retail Store Manager

Age: 30–50 Years

Occupation: Retail Store Manager / Sales Analyst

Experience

Manages store operations, product placement, pricing strategies, and sales performance.

Goals

- Understand sales performance across different product positions.
- Identify the best-performing product categories.
- Analyze the impact of promotions on sales.
- Compare competitor pricing with product sales.
- Improve customer satisfaction and revenue.
- Make informed business decisions using interactive dashboards.

Challenges

- Large amount of raw retail sales data.
- Difficulty identifying effective product placement strategies.
- Manual sales analysis is time-consuming.

- Limited understanding of customer buying patterns.
- Difficulty comparing competitor pricing and promotions.

Customer Journey Map (Five Stages)

Stage	Customer Actions	Pain Points	Opportunities
Discover	Reviews retail sales data and business reports.	Data is scattered and difficult to interpret.	Use Tableau dashboards for quick visualization.
Analyze	Examines sales trends, product categories, and customer demographics.	Manual analysis takes time.	Interactive charts simplify analysis.
Decide	Compares promotions, competitor pricing, and product placement.	Uncertainty in selecting the best strategy.	Data-driven insights support better decisions.
Implement	Applies new product placement and promotional strategies.	Monitoring results manually is difficult.	Dashboards track performance continuously.
Evaluate	Reviews sales improvements and customer response.	Identifying successful strategies is challenging.	Tableau Story summarizes business outcomes and supports continuous improvement.
