

Project Design Phase

Problem – Solution Fit Template

Date	15 February 2025
Team ID	
Project Name	Strategic Product Placement Analysis
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ **Understand the existing situation in order to improve it for your target group.**

WHY: Define the Purpose	1. CUSTOMER (PROJECT) CP - Retail Company – seeks to understand how product positioning impacts sales and consumer behavior. - End goal is to optimize product placement strategies and drive revenue growth.	4. CUSTOMER CONTEXT CC - Highly competitive retail environment with diverse customer segments. - Large product catalog across multiple categories and store locations. - Need for data-driven decisions to improve sales performance and customer satisfaction.	7. BUSINESS OUTCOMES BO - Identify the most effective product positioning strategies that drive higher sales. - Understand consumer preferences and behavior based on placement. - Improve marketing and merchandising ROI. - Increase overall revenue and customer loyalty.	WHAT: Define the Outcomes
	2. ANALYTICS APPROACH / TECHNIQUES AT - Exploratory Data Analysis (EDA) to understand data distribution and trends. - Comparative Analysis to evaluate product positioning strategies. - Segmentation Analysis based on demographics, region, category, etc. - Correlation Analysis to find relationships between positioning and sales. - KPI Analysis to measure performance.	5. PROPOSED DATA SOURCES DS - Sales Data (transaction level sales details) - Product Data (category, price, brand, attributes) - Product Placement Data (shelf position, store, display type) - Customer Demographics (age, gender, location, income group) - Marketing Campaign Data (promotions, discounts, ads)	8. APPLICATIONS AP - Interactive Tableau Dashboard for product positioning analysis. - Sales performance tracking across products, categories, and locations. - Consumer behavior insights for targeted marketing. - Scenario analysis for testing different positioning strategies.	
HOW: Define the Approach	3. ENABLES EN - Clean, integrated, and structured data enabling accurate analysis. - Data transformation and modeling for meaningful insights. - Reliable data foundation for KPI calculations and dashboards.	6. YOUR SOLUTION SL - Build an interactive Tableau dashboard to analyze the impact of product positioning on sales and consumer behavior. - Visualize key metrics and trends across categories, locations, and demographics. - Provide actionable insights and recommendations to optimize product placement strategies.	9. EXAMPLES OF MEASURES CM - Total Sales - Sales Growth % - Conversion Rate - Avg. Order Value - Product Placement Effectiveness Score - Customer Segmentation Insights - ROI on Promotions	MEASURING SUCCESS: Criteria
	4. PROJECT PLAN / ACTIONS PA - Data collection and integration - Data cleaning and preprocessing - Exploratory data analysis - Dashboard design and development in Tableau - Validation and stakeholder review - Deployment and feedback
