

Project Performance Test

Date	June 2026
Team ID	
Project Name	Strategic Product Placement Analysis
Maximum Marks	

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values																																																																																																																																																																																																																																																																														
1.	Data Rendered	“FMCG retail dataset with 52 records and fields such as Product Category, Price, Competitor Price, Promotion, Foot Traffic, Seasonality, and Sales Volume.” 																																																																																																																																																																																																																																																																														
2.	Data Preprocessing	“Verified data types, handled missing values, removed duplicates, and standardized” <table><tr><th>Product ID</th><th>Product 3.	Utilization of Filters	“Filters used: Product Category, Promotion Status, Foot Traffic Level, Consumer Demographics, and Seasonal Flag.”																																																																																																																																																																																																																																																																														

4.	Calculation fields Used	“Calculated fields: <i>Price Difference</i> (Price – Competitor Price) and <i>Moving Average of Sales Volume</i>.”
5.	Dashboard design	PRODUCT PLACEMENT ANALYSIS-DASHBOARD
6	Story Design	Strategic Product Placement Analysis
